1. How big was the insurance .csv file (once uncompressed)? (i.e. what was the output in 3(e)?)
 - The Florida insurance CSV file was 10MB once uncompressed.
2. How many lines did the CSV file have before doing the end-of-line (EOL) conversion? (see 3(g))
 - Before EOL conversion, the file had 1 line.
3. How many lines did the CSV file have after doing the EOL conversion? (see 3(j))
 - After EOL conversion, the file had 36634 lines.
